

GARIMA RAJPUT

9171490205 | kr3163998@gmail.com

OBJECTIVE

To work as a Clinical Perfusionist and apply my knowledge in CPB management and cardiac surgical support while continuously learning and improving my clinical skills.

EXPERIENCE

Rajshree apollo hospitals indore Madhya Pradesh

December 2025 - Ongoing

Trainee perfusionist

- Worked under the supervision of Dr. Kshitij Dubey (Adult Cardiac Surgery) and Dr. Nishith Bhargava (Pediatric Cardiac Surgery).
- Assisted and observed cardiopulmonary bypass (CPB) procedures in adult and pediatric patients.
- Hands-on / Learning Experience:
 - Priming of heart-lung machine and circuit preparation
- Assisted in arterial and venous cannulation setup
- Monitoring of ACT, blood gases (ABG), and anticoagulation management
- Assisted in administration of cardioplegia (delnido solution)
- Management of flow rates, pressure, temperature, and perfusion parameters during CPB
- Understanding of oxygenator and heat exchanger functioning
- Assisted in weaning from CPB
- Basic exposure to Intra-Aortic Balloon Pump (IABP)
- Coordination with surgical and anesthesia team during procedures
- Adult Cardiac Cases:
 - CABG (Coronary Artery Bypass Grafting)
 - Valve Replacement Surgeries
- Pediatric Cardiac Cases:
 - ASD, VSD Closure
 - TOF Repair
 - PDA Ligation
 - BT Shunt
 - Pulmonary Valvotomy
 - Glenn Procedure
 - Fontan Procedure
 - Rastelli Procedure
 - Resection procedures

EDUCATION

SKILLS

SKILLS • Operation and monitoring of Heart-Lung Machine (HLM) and Cardiopulmonary Bypass (CPB) • Circuit assembly, priming, and perfusion equipment calibration Adult and pediatric CPB calculations • CPB circuit setup (adult & pediatric) Assistance with arterial and venous cannulation • Anticoagulation management, including ACT monitoring Hemodynamic and blood gas (ABG) monitoring and interpretation Knowledge of oxygenators, pumps, filters, and temperature management • Temperature regulation using heat exchanger • Myocardial protection and cardioplegia delivery Recognition and management of CPB complications • Management of low venous return and air embolism prevention • Rapid priming and emergency CPB initiation Clear crisis communication during intraoperative events • Ability to work efficiently in OT environment and coordinate with surgical team • Basic computer skills for perfusion record systems • Knowledge of ECMO / ECLS (basics) • Pump assisting during cardiac surgeries under supervision • Machines: Sarns 8000 Heart-Lung Machine Stockert S3 Heart-Lung Machine

LANGUAGES

Hindi & English

ACHIEVEMENTS & AWARDS

• B.Sc. Perfusion Technology (Final Year) Sumandeep Vidyapeeth University, Vadodara, Gujarat (Expected 2026) • Class 12th (Higher Secondary) – 84.6% Government Girls' Higher Secondary School Khirkiya, Madhya Pradesh 2022 • Class 10th (Secondary) – 95% Government Girls' Higher Secondary School Khirkiya, Madhya Pradesh 2020

STRENGTH

Quick learner and adaptable

Strong teamwork and communication

Calm under pressure

Detail-oriented with focus on patient safety

• ECMO Workshop (Extracorporeal Membrane Oxygenation) Organized by Reliance Foundation Conducted at Bombay Hospital Indore Year: 2026 • Attended workshop on ECMO principles and clinical applications • Gained knowledge of ECMO circuit components, indications, and patient selection • Learned basics of VA and VV ECMO configurations • Observed ECMO setup, priming, and monitoring parameters • Introduction to troubleshooting and patient management on ECMO
