Vadodara, Gujarat

Professional Summary

Dedicated and compassionate **B.Sc. Nursing graduate** with hands-on clinical training and comprehensive internship experience at Dhiraj General Hospital. Proficient in delivering high-standard patient care across critical departments, including Operation Theatre (OT), Intensive Care Unit (ICU), and Infection Control protocols. Adept at handling emergency situations, participating in specialized healthcare programs like epilepsy care, and executing effective disaster management strategies. Eager to contribute clinical expertise, strong patient advocacy, and meticulous attention to detail as a professional Staff Nurse in a progressive healthcare institution.

Core Competencies & Clinical Skills

Clinical Patient Care: Operation Theatre (OT) assisting, Intensive Care Unit (ICU) monitoring, comprehensive patient assessment, vital signs tracking, and bedside care

Specialized Nursing: Infection control practices, biomedical waste management, aseptic techniques, epilepsy care program support, and emergency response

Emergency Disaster Management: Triage protocols, rapid response coordination, disaster preparedness, and basic life support

Professional Attributes: Compassionate bedside manner, effective interdisciplinary communication, high-stress adaptability, critical thinking, and adherence to medical ethics

Professional Experience & Clinical Internship

Intern

Dhiraj General Hospital

Clinical Rotation Period

Vadodara, Gujarat

- Rotated through high-intensity hospital departments, including the Intensive Care Unit (ICU), Operation Theatre (OT), and general medical-surgical wards, providing holistic patient care under senior supervision.
- Assisted surgical teams in the OT, ensuring proper instrument sterilization, sterile field maintenance, and seamless intra-operative support.
- Monitored critical patients in the ICU, maintaining accurate charts of vital signs, administering medications as prescribed, and promptly reporting clinical changes to physicians.
- Implemented strict infection control measures and proper biomedical waste disposal guidelines across all assigned units.
- Actively participated in community and institutional health initiatives, including specialized epilepsy awareness and support programs, as well as emergency and disaster management drills.
