

Bhumika P. Rana

Doctor of Pharmacy

Email: ranabhumika3013@gmail.com | Phone: +91 9879575539 | Location: Vadodara, Gujarat |

PROFESSIONAL SUMMARY

- Clinical Research professional with hands-on experience in clinical research coordinator (Intern) and site management across Phase III studies at a tertiary care hospital. Experienced in patient recruitment, informed consent process, source documentation, and ensuring protocol adherence in compliance with ICH-GCP and NDCT 2019. Proficient in EDC systems (iMedidata) and IWRS platforms, with strong exposure to query resolution, data quality checks, and audit/inspection readiness. Adept at coordinating with investigators, ethics committees and CROs to ensure smooth study conduct and timely deliverables. Demonstrates strong organizational, communication, and monitoring readiness skills with a keen eye for detail and regulatory compliance. Seeking to transition into a CRC role.

PROFESSIONAL EXPERIENCE

Clinical Research Coordinator |

- Sterling Hospitals | Vadodara, Gujarat | May 2025 to December 2025
- Coordinate and support execution of **Phase III clinical trials**, ensuring alignment with study timelines, milestones, and protocol requirements.
- Maintain and track study progress, site activities, and trial metrics, supporting timely delivery of study objectives.
- Manage regulatory documentation, including **EC submissions, approvals, amendments, and renewals with 100% regulatory compliance**.
- Support **eTMF/TMF maintenance**, ensuring completeness, accuracy, and inspection readiness.
- Perform data entry and query resolution in EDC systems (**Medidata Rave**) ensuring high-quality data.
- Track investigational product (IP) accountability and IWRS (**FlexAdvantage, SUVODA**) activities, ensuring protocol compliance.
- Contribute to audit/inspection readiness, including documentation review, deviation tracking, and CAPA support.
- Clinical trial documentation practices.

CP in ER

Cambay General Hospital | Khambhat, Gujarat | January 2026 to June 2026

- Clinical Pharmacist with expertise in medication review and reconciliation, patient safety, medication error prevention, pharmacovigilance, ADR reporting, signal detection, causality assessment (WHO-UMC and Naranjo Scale), MedDRA terminology, drug safety monitoring, and drug interaction assessment. Experienced in supporting Pharmacy and Therapeutics Committee (PTC) activities, formulary management, and evidence-based medication use. Strong knowledge of medical terminology and clinical pharmacology, with the ability to collaborate effectively within multidisciplinary healthcare teams. Additionally skilled in emergency and acute care support, including primary patient assessment and treatment, wound management and suturing assistance, orthopedic slab application, and emergency

patient care to ensure timely and safe clinical interventions.
