- Team Leadership & Staff Management
- Compliance & Safety Management
- Transport & Fleet Management
- Facility Audits & Inspections
- Fire & Safety Coordination
- SOP Development & Implementation
- Energy Management
- ERP & Facility Software Handling

SNAP SHORT WORK EXPERIENCE:

2026-04- Present HOD. Facilities & Maintenance (HO)

Swarnim Group (Pharma, University, Real estate & International School) Ahmedabad, Gujarat

Key Responsibilities: Hard Services

- Manage overall facility operations including administration, maintenance, housekeeping, security, transport, and utility services.
- Handle preventive and breakdown maintenance for electrical, HVAC, plumbing, civil, DG sets, STP, WTP, and firefighting systems.
- Monitor annual maintenance contracts (AMCs) and service-level agreements with vendors.
- Prepare maintenance schedules and ensure timely execution.
- Control facility budgets, operational expenses, and procurement activities.
- Supervise technical and administrative teams for efficient operations.
- Ensure compliance with safety standards, statutory regulations, and audit requirements.
- Coordinate office infrastructure setup, renovation, and space management activities.
- Conduct facility inspections and implement corrective actions.

- Manage inventory, spare parts, and asset records.
- Implement energy-saving initiatives and cost optimization programs.
- Coordinate emergency response and crisis management activities.

Client Relationship Management:

- Managing relationships with property owners, investors, tenants, and corporate clients.
- Serving as the primary point of contact for client queries, concerns, and escalations.
- Ensuring seamless property management and facilities services delivery.
- Conducting regular client meetings, property inspections, and performance reviews.
- Coordinating lease administration, renewals, and tenant onboarding processes.
- Monitoring service level agreements (SLAs) and key performance indicators (KPIs).
- Resolving tenant and client issues promptly to maintain satisfaction and retention.
- Managing vendor performance and ensuring quality service delivery.
- Supporting occupancy, retention, and revenue growth initiatives.
- Preparing management reports, client presentations, and operational reviews.

Team Management:

- Drive excellence across all O&M domains by aligning team goals with organizational objectives.
- Build a strong leadership pipeline by driving succession planning, preparing high-potential talent for leadership roles, and ensuring measurable improvements in team capability.
- Enhance team performance through specialized training in HVDC, protection systems, and condition monitoring, ensuring technical excellence across the team.
- Ensure ongoing engagement and motivation by developing Individual Development Plans (IDPs) and implementing reward and consequence management programs to sustain high team performance.

Stakeholder Management:

- Ensure smooth project execution and operational stability by fostering collaboration among internal teams and external stakeholders, including Load Dispatch Centers (LDCs), subcontractors, and technology providers.
- Enhance organizational reputation by building trust and transparency with stakeholders through impactful representation at national and international forums, regulatory discussions, and industry engagements.
- Minimize disruptions by proactively resolving operational challenges through cross-functional stakeholder engagement initiatives aligned with organizational objectives.

Key Responsibilities: Soft Services

Facilities Soft Services are non-technical services that support the day-to-day operations, cleanliness, safety, and comfort of a facility, office, residential complex, hospital, university, mall, or commercial property

Housekeeping Management

- Cleaning and sanitation of premises
- Washroom hygiene maintenance
- Waste collection and disposal
- Pest control coordination
- Deep cleaning schedules

Security Management

- Security manpower deployment
- Access control systems
- Visitor management
- Emergency response procedures
- CCTV monitoring coordination

Landscaping & Horticulture

- Garden maintenance
- Tree and plant care
- Irrigation system monitoring
- Seasonal plantation programs

Front Office & Helpdesk Operations

- Reception management
- Customer service support
- Complaint handling and resolution
- Visitor assistance

Pantry & Cafeteria Management

- Food service coordination
- Vendor management
- Hygiene compliance
- Inventory control

Waste Management

- Segregation of waste
- Recycling initiatives
- Hazardous waste handling

- Sustainability programs

Vendor & Contract Management

- Service provider evaluation
- SLA and KPI monitoring
- Contract renewals
- Cost optimization

Health, Safety & Compliance

- Safety audits
- Fire safety compliance
- Emergency evacuation drills
- Statutory compliance monitoring

Key Achievements:

- Reduced maintenance operational costs by implementing preventive maintenance strategies.
- Improved vendor performance and service quality through SLA monitoring.
- Successfully handled facility operations for multiple departments/sites.
- Achieved high compliance standards during safety and facility audits.
