Skills

- Medication Therapy Management
- Patient Counselling
- Comprehensive drug knowledge
- Pharmacotherapy and therapeutic planning
- Drug selection and Dose optimisation
- Interpersonal skills
- Medical care

Research Work

Clinical Trial Experience:

•During my Pharm.D 6th year, I gained hands-on experience as a Clinical Research Coordinator (CRC) at Dhiraj Hospital, contributing to pediatric vaccine clinical trials. I worked on studies BECT 094, BECT 089, ZTCV.24.001, and an MMR vaccine study, evaluating the immunogenicity and safety of hexavalent, hexavalent + OPV, Typhoid Vi conjugate, and MMR vaccines.

My responsibilities included supporting participant safety, informed parental consent, accurate documentation, protocol compliance, and study procedures, with a strong focus on ethical conduct in pediatric clinical research.
