👤 PROFILE

Passionate and dedicated Medical Officer with hands-on experience in both India and the U.S., committed to delivering patient-centered care. Having worked in a busy government hospital, I've handled everything from acute treatments to chronic disease management, while also mentoring medical students. My U.S. clinical experience exposed me to advanced healthcare systems, EMRs, and patient care approaches, further sharpening my diagnostic and procedural skills. I thrive in fast-paced environments, enjoy solving complex medical cases, and believe in the power of compassionate, evidence-based medicine. Ready to bring my skills, adaptability, and patient-first mindset to a dynamic healthcare team.

🏥 PROFESSIONAL EXPERIENCE

BJ Medical College

Internship

02/2019 – 02/2020 | Ahmedabad, India

Obtained a detailed history of present illness, conducted comprehensive physical examinations, formulate differential diagnosis, ordered laboratory and imaging, and discussed treatment plan with patient.

Applied theoretical knowledge in a clinical setting, and used evidence-based medicine for clinical decision making.

Performed procedures like lumbar puncture, peripheral IV insertion, placement of urinary catheters, and nasogastric tubes.

Gained experience in interpreting EKGs, X-rays, and CT scans, which significantly

deepened my understanding of patient care.

Worked in a multidisciplinary team to collaborate and positively impact healthy outcomes in patient care.

Sheth Vadilal Sarabhai Hospital

Medical Officer

12/2022 – 03/2025 | Ahmedabad, India

Successfully diagnosed and managed a diverse range of conditions, excelling in complex case management through close collaboration with various specialties to improve patient outcomes.

Gained valuable hands-on experience in performing procedures such as abdominal paracentesis, thoracentesis, and arthrocentesis, guided by a rheumatologist, directly improving procedural proficiency.

Demonstrated a strong commitment to continuous learning by tackling daily

Mount Sinai Hospital

Cardiology Extern

06/2024 – 07/2024 | Brooklyn, United States of America

Collaborated with a multidisciplinary team to provide comprehensive care by obtaining detailed histories of present illness, conducting physical examinations, and discussing findings with the attending physician.

Engaged in discussions on diagnoses, imaging, and management plans with attending and patients.

Gained hands-on experience in observing and assisting with radio ablation procedures for varicose veins, primarily targeting the Greater and Small saphenous veins, and assisted in setting up and conducting ultrasounds for patients with leg swelling or pain

ORGANISATIONS

Hanuman Mandir of New York

Community service

Queens, United States of America

Efficiently registered patients, checked vitals, and flagged any issues such as

hypertension, offering immediate advice on medication and lifestyle modifications.

Assisted with blood test services, including CBC, CMP, HbA1C, and lipid panels, ensuring patients received their results by mail, and volunteered as a blood draw subject to support pre-medical students' learning.

Provided education on managing chronic conditions like COPD, diabetes, and thyroid disorders, demonstrating a strong commitment to patient care and community outreach.

Contributed to setting up the camp and ensuring smooth operations, serving a predominantly South Asian community remaining culturally aware and discussing taboo topics to enhance education.

Hackensack Meridian Health Palisades Medical Center

Internal Medicine Extern

07/2024 – 08/2024 | New Jersey, United States of America

Obtained anthropometric measurements, detailed histories, and conducted physical examinations, documenting SOAP notes in eClinicalWorks EMR.

Administered IM injections, flu vaccines, and facilitated earwax removal, ensuring patient comfort and safety

Performed and interpreted EKGs. Collaborated in a multidisciplinary team to manage

chronic conditions like hypertension, COPD, and diabetes.

Emphasized the importance of empathy in patient care and improving healthcare access

in underserved communities.

Actively engaged in preventive medicine, discussing medication adherence, lifestyle

modifications, vaccination schedules, healthy eating, exercise, and smoking cessation.

Brooklyn Cancer Care Medical P.C

Internal Medicine Extern

06/2024 – 07/2024 | Brooklyn, United States of America

Conducted thorough history taking and comprehensive assessments, discussed

differential diagnoses, and collaborated with attending physicians on laboratory

workups, imaging, and management plans.

Documented SOAP notes and regularly updated patient charts in the Practice Fusion

EMR system, ensuring accurate and up-to-date patient records.

Provided care to a patient with osteonecrosis due to Protein C and S deficiency, her

positive attitude, despite severe pain, reinforced the importance of compassion and resilience in patient care.

Actively participated in research activities and case studies, applying medical

knowledge in a clinical setting to enhance patient care.

Sheth Vadilal Sarabhai Hospital

Co-Investigator

12/2022 – 03/2025 | Ahmedabad, India

Actively participated in over 10 clinical trials, overseeing phases II through IV, and

working closely in an interdisciplinary team.

Maintained rigorous adherence to regulatory standards and trial protocols to ensure

data integrity and patient safety, and managed unexpected complications.

Conducted thorough patient screenings, explained trial details including safety profiles

and potential adverse effects, obtained informed consent, and collected baseline data

with meticulous documentation.

Monitored patients closely for adverse events, conducted regular blood investigations,

and scheduled follow-up visits to assess drug efficacy, and ensured accurate data submission and compliance with protocols through audits.

Geeta Metabolic Clinic

Medical Officer

04/2020 – 07/2022 | Ahmedabad, India

Assisted the lead doctor with hands-on patient care, including administering intramuscular (IM) and subcutaneous (S/C) medications and placing peripheral catheters.

Secured vital oxygen supplies and administered scarce treatments like remdesivir, advocating tirelessly for patients' lives during a time of severe shortages.

Developed adaptability and resourcefulness in a resource-limited setting, ensuring the continuation of high-standard patient care despite significant challenges.

Collaborated with a team of healthcare professionals to deliver critical care under challenging circumstances.

Focused not only on disease management but contributed to overall well being with empathy and compassion.
